What is the IB Diploma?

Igniting Passion for Learning

Where will your passion take you?

IBDP is a bilingual program, fostering international mindedness, especially designed for international students to prepare them for lifelong learning.

“IB gives you a taste of everything, so try to be well-rounded and don't be disappointed when it doesn't quite go as you had expected. Some people will excel academically, yet never follow their true passion, so find what drives you and embrace it.” IBDP Alumni Anna-Sophia Lazarou – Australia

Igniting Academic Purpose

Where will your purpose take you?

The IBDP is a two-year program with a broad curriculum of breadth and depth to explore six subjects deeply. The IBDP is made up of six subject groups and a core, comprising theory of knowledge (TOK), creativity, activity, service (CAS) and a research paper of up to 4,000 words, the extended essay (EE);

Our mission is to develop caring, lifelong learners and global citizens in a culture of excellence through an international, well-balanced education.

Group 6	The Arts HL/SL	Visual Arts

“The International Baccalaureate® (IB) programmes aim to do more than other curricula. The IB gives students distinct advantages by building their critical thinking skills, nurturing their curiosity and their ability to solve complex problems.” Why IB is different - International Baccalaureate® (ibo.org)

Where will your potential take you?

The IB Diploma is a passport to study at some of the best universities in the world. The DP qualification is widely respected by top universities.

Proven by Research

98% of students aspired to at least a bachelor’s degree and 81% aspired to a master’s, doctoral or professional degree. In line with previous research, about 85% of DP students in the United States (US) enrolled in university immediately after high school, compared to 66% of all US high school graduates. DP students were also more likely than other US students to continue on to their second year of university.

A study in Australia, England and Norway found that DP students had significantly higher levels of critical thinking compared to their matched non DP Peers.”
